Welcome to the OC Trial Test Course (OCTTC)

Building confidence, skill, and readiness for the OC exam

The OC Trial Test Course (OCTTC) is designed specifically for Year 3 and 4 students preparing for the Opportunity Class (OC) Placement Test. The program builds exam readiness by familiarising students with question formats and recreating the test environment, helping them feel more comfortable and confident on exam day. Weekly practice with exam-style questions leads to steady improvement in skills and performance. Students' progress is assessed and monitored each week, giving parents a indication of the score range their child may achieve in the actual exam. By reviewing OCTTC results, parents can better identify which OC schools align with their child's application.

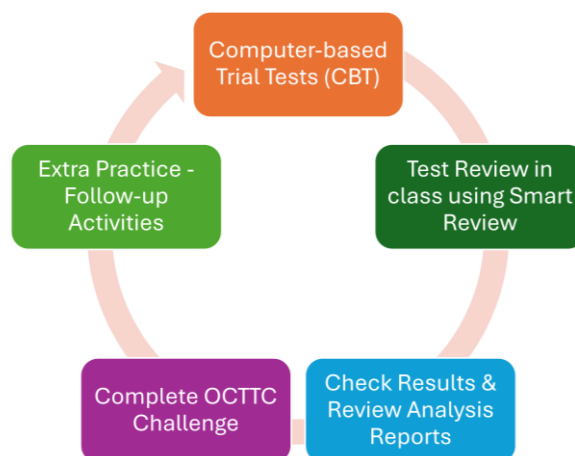

Updated Materials Backed by Experience and Data

OC exam preparation needs to reflect the current test format, recent question trends, realistic timing, and today's standards of reasoning and accuracy. That's why we update our OCTTC materials every year. The course mirrors the official exam structure, helping students master the computer-based test (CBT) environment, manage time effectively, and handle modern question types.

The OCTTC Learning Cycle

Each OCTTC week should follow this routine.

1. Sit the CBT Trial Test and treat every test like a real exam to build focus, timing, and decision-making.
2. Review the test in class with the teacher to understand effective approaches.
3. Check your emailed results as the starting point for your test review.
4. Go through the 'My Result' analysis on Cyberschool to identify weak areas and any overlooked items.
5. Complete the relevant Challenge and follow-up tasks on Cyberschool.

Term vs. Holiday OCTTC Structure

During a regular term, the course follows a two-week cycle. The first week covers Reading, and the second week focuses on Mathematical Reasoning & Thinking Skills. Each new test cycle begins on Saturday and repeats through Sunday, Tuesday, and Wednesday according to the schedule below.

Saturday	Sunday	Thursday
9:40am – 12:50 pm or 1:40pm – 4:40 pm	1:10pm – 4:00 pm	4:20 pm – 7:30 pm

During the holiday OCTTC, one full set will be completed in a single day, including the test and review.

OCTTC Challenge & Cyberschool Follow-Up Tasks

After each OCTTC class, students complete the Cyberschool Challenge and follow-up tasks at home to review mistakes and reinforce learning.

- The Challenge allows them to retry missed Mathematical Reasoning (MR), Thinking Skills (TS), and Reading questions and understand why their original answers were incorrect.
- Completing the Reading Challenge unlock an extra reading test (1+1 Reading) for additional practice.
- The Vocabulary Practice Test uses the essential word list from the English Workbook. Vocabulary directly affects the Reading Test, so students should learn all listed words and complete the workbook practice.
- Additional MR/TS questions after MR/TS Challenge offer extension practice, and the MR/TS workbook along with its CBT version, provides further problem-solving and online test familiarity.
- English & MR/TS Workbook answers are provided so students can check their work.

Access Period for Challenge & Follow-Up Tasks

Cyberschool Challenge and follow-up tasks are only available during a set access period. Students must complete their Challenge activities and follow-up tasks before access closes. Don't leave these tasks until the last minute, as they will no longer be available once the period ends.

Absence and Make-Up

Missed tests can be completed during the make-up period, but these sessions do not include the teacher-led review. Regular attendance is strongly recommended. If a student misses their OCTTC class, they must book a make-up test within one week.

OCTTC Fee Payment Regulations & Discount Offer

- The current OCTTC fee is \$80 per session.
- Enrol in full term OCTTC before the course starting date. If you enrol after the course starting date, you must pay the fee for the remaining number of sessions of the term.
